

# #99042 Quick Operation Guide

**NOTE: Ensure you lift your Marine Smart Box with both handles.**

## To Install battery:

1. Remove Marine Smart Box lid and carefully place Battery in the Marine Smart Box bottom with the terminals at the back.
2. Connect the red positive (+) battery lead to the Positive (+) terminal of the battery.
3. Connect the black negative (-) battery lead to the Negative (-) terminal of the battery.
4. Place lid on top.
5. Secure the box carefully tightening the strap in the middle of the box. Screw plastic brackets into deck accordingly.
6. Prior to pushing your test button, be sure your engine is off. When Testing the battery, the charger should not be on.

If your box has been subjected to a lot of water, please remove the battery as soon as possible and drain away any excess dirt / moisture that has accrued near the battery terminals.
